In statistics, the standard score is the signed fractional number of standard deviations by which the value of an observation or data point is above the mean value of what is being observed or measured. Observed values above the mean have positive standard scores, while values below the mean have negative standard scores. It is calculated by subtracting the population mean from an individual ...

The sign test is a statistical method to test for consistent differences between pairs of observations, such as the weight of subjects before and after treatment. Given pairs of observations (such as weight pre- and post-treatment) for each subject, the sign test determines if one member of the pair (such as pre-treatment) tends to be greater than (or less than) the other member of the pair ...

Pierre Rémond de Montmort , em seu livro Essay d'analyse sur les jeux de hazard. Reconhece-se a probabilidade (a aposta) de uma variável (a duração de um jogo) ser menor que um valor (um certo número determinado), que representa a função de distribuição da distribuição de probabilidade de um jogo. Essa é a tese de Nicolau Bernoulli , publicada em 1711, em que aparece pela primeira ...
