Algebra Help (solutions, examples, videos)

A percent by itself represents just a fraction of a whole. When you multiply a number by that percent, you're calculating the value for that fraction of the original number.

How to Multiply a Number by a Percent | Sciencing

To increase a number by a percentage, first find that percentage of the number, and then add the result to the original number. The process is the same for all numbers and percents.

How to Increase a Number by a Percentage | Sciencing

If you encounter a variable on both sides of the equal sign, don't assume it's a typo and move on to the next problem; it may very well be there on purpose. The key to solving these types of equations is to move all the terms containing the variable to one, and only one, side. It doesn't matter ...
