Pronunciation of Terminology What is the Respiratory System? The respiratory system is an integrated arrangement of organs and structures which functions to extract oxygen from the atmosphere into the bloodstream and expel carbon dioxide, a waste product of metabolism, from the bloodstream into the atmosphere. It consists of the respiratory tract, the muscles used for breathing and the part of the brain that controls breathing.

### **Medical Terminology: Respiratory System Anatomy**

The main role of the Respiratory System is the inhalation of fresh oxygen (O<sub>2</sub>) needed by the body's cells and the exhalation of waste carbon dioxide (CO<sub>2</sub>). It also helps maintain body temperature and eliminate excess water from the body. The Respiratory system is dependent on the proper functioning of the circulatory system as the O<sub>2</sub> and waste CO<sub>2</sub> are carried in the blood stream.
