Pressure: 50 psi - 5,000 psi Flow rate: 0 us gal/min - 0 us gal/min. If you are looking for one of the most modern and durable flow regulating valves, this model manufactured by Lee Flosert may be suitable for you. This valve has been specifically designed to work well ...

Valve, Spigot - All industrial manufacturers - Videos

Biodegradation is a chemical process in which materials are metabolised to CO₂, water, and biomass with the help of microorganisms. The process of biodegradation depends on the conditions (e.g. location, temperature, humidity, presence of microorganisms, etc.) of the specific environment (industrial composting plant, garden compost, soil, water, etc.) and on the material or application itself.

N2O - Nitrous oxide - Nitrogen dioxide

Blood transfusion is the process of transferring blood or blood products into one's circulation intravenously. Transfusions are used for various medical conditions to replace lost components of the blood. Early transfusions used whole blood, but modern medical practice commonly uses only components of the blood, such as red blood cells, white blood cells, plasma, clotting factors, and platelets.
