Computational Mechanics of Materials and Structure is concerned with the simulation of advanced engineering problems using modelling techniques, computer implementation, experimental verification and case study investigation. This Master of Science program provides the basis of high-tech engineering design for a broad spectrum of applications.

Computational Mechanics of Materials and Structures ...

Celestial motion, without additional forces such as thrust of a rocket, is governed by gravitational acceleration of masses due to other masses. A simplification is the n-body problem, where the problem assumes some number n of spherically symmetric masses. In that case, the integration of the accelerations can be well approximated by relatively simple summations.
