Atomism, any doctrine that explains complex phenomena in terms of aggregates of fixed particles or units. This philosophy has found its most successful application in natural science: according to the atomistic view, the material universe is composed of minute particles, which are considered to be relatively simple and immutable and too small to be visible.

An electric spark is an abrupt electrical discharge that occurs when a sufficiently high electric field  
creates an ionized, electrically conductive channel through a normally-insulating medium, often air  
or other gases or gas mixtures. Michael Faraday described this phenomenon as "the beautiful flash  
of light attending the discharge of common electricity".
