differences between plutonic and volcanic rocks are more complex and more revealing of the geological evolution of the earth. Thus, a representative plutonic rock would be granite, while representative in turn of volcanic rock would be basalt. Besides the difference between the large crystals of the former and the microscopic crystals of the latter, they contrast markedly in color.

FORCES . A force is any push or pull that causes an object to move, stop, or change speed or direction.; The greater the force, the greater the change in motion will be. The more massive an object, the less effect a given force will have on the object.; Unless acted on by a force, objects in motion tend to stay in motion and objects at rest remain at rest.
