The following is a list of people who are considered a "father" or "mother" (or "founding father" or "founding mother") of a scientific field. Such people are generally regarded to have made the first significant contributions to and/or delineation of that field; they may also be seen as "a" rather than "the" father or mother of the field. Debate over who merits the title can be perennial.

What you probably want is `dir()`.. The catch is that classes are able to override the special `__dir__` method, which causes `dir()` to return whatever the class wants (though they are encouraged to return an accurate list, this is not enforced). Furthermore, some objects may implement dynamic attributes by overriding `__getattr__`, may be RPC proxy objects, or may be instances of C-extension classes.
