The following is a list of people who are considered a "father" or "mother" (or "founding father" or "founding mother") of a scientific field. Such people are generally regarded to have made the first significant contributions to and/or delineation of that field; they may also be seen as "a" rather than "the" father or mother of the field. Debate over who merits the title can be perennial.

During the seventeenth and especially eighteenth centuries, driven both by a desire to understand nature and a quest to make balloons in which they could fly (), a number of scientists established the relationships between the macroscopic physical properties of gases, that is, pressure, volume, temperature, and amount of gas. Although their measurements were not precise by today's standards ...

This NGram should be sufficient evidence that people usually use digits. If nothing else, it avoids things getting really tedious if you needed to refer to chapter one hundred and twenty-eight when writing about some truly weighty tome (or one with a lot of short chapters).. As regards capitalisation, I've no doubt people sometimes do it even in references within text, but I think it looks ...
