"On day 560, a little more than eighteen months into the experiment, the population peaked at 2,200 mice and its growth ceased. A few mice survived past weaning until day six hundred, after which there were few pregnancies and no surviving young.

What Humans Can Learn From The Mice Utopia Experiment ...

Results. Non-acylated, Aib2 substituted analogs derived from human GIP sequence showed full in vitro potency at human GIPR and subtly reduced in vitro potency at mouse GIPR without cross-

reactivity at GLP-1R. These GIPR agonists lowered acute blood glucose in wild-type and *Glp1r*^{-/-} mice, and this effect was absent in *Gipr*^{-/-} mice, which confirmed selectivity towards GIPR.

Optimized GIP analogs promote body weight lowering in mice ...

Pulmonary fibrosis is a disease by which environmental toxins cause widespread fibrosis in the lungs of people who are genetically predisposed to it - its been known for some time that this is a short telomere disease; turnover in the lungs is high anyway, and this is why there is so much cellular senescence in those with the disease.

Mate choice is one of the primary mechanisms under which evolution can occur. It is characterized by a “selective response by animals to particular stimuli” which can be observed as behavior. In other words, before an animal engages with a potential mate, they first evaluate various aspects of that mate which are indicative of quality—such as the resources or phenotypes they have—and ...

The parable of the blind men and an elephant originated in the ancient Indian subcontinent, from where it has been widely diffused. However the meaning of the popular proverb differs in other countries. It is a story of a group of blind men, who have never come across an elephant before and who learn and conceptualize what the elephant is like by touching it.

Blind men and an elephant - Wikipedia

What causes the fresh smell we experience just before the onset of a storm or shower of rain, which is especially noticeable after an extended dry spell?
