The Interconnecting Cisco Networking Devices Part 1 (ICND1) exam (100-105) is a 90-minute, 45-55 question assessment that is associated with the Cisco Certified Entry Network Technician (CCENT) certification and is a tangible first step in achieving other associate-level certifications. This exam tests a candidate's ...

ICND1 Exam Topics - The Cisco Learning Network

Important! This experiment has a tendency to stay "swapped in" because the nodes on the system appear to be "busy". We don't want our labs to waste DETER resources, so in order to make sure that unused nodes are not left idle, the maximum amount of time this lab will stay swapped in at once is six hours. If you need it for more than six hours in one sitting, you will need to swap out and back ...

PBX-to-PBX Calls. PBX-to-PBX calls, as shown in Figure 3-5, originate at a PBX at one site and terminate at a PBX at another site while using the network as the transport between the two locations. Many business environments connect sites with private tie trunks. When migrating to a converged voice and data network, this same tie-trunk connection can be emulated across the IP network.

Configuration Management is a key process enabling integrated product and process development and support. A "configuration" is a relative arrangement of interconnected parts forming a system or piece of equipment.

CMTF Configuration Management Training Foundation

When I wrote my "getting started" post on offensive security, I promised I'd write about building a lab you can use to practice your skillset. It's taken a little while for me to get to it, but I'm finally trying to deliver. Much like the post on getting started, I'm not claiming to have all the answers.

Building a Home Lab for Offensive Security & Security ...
