Primary keys in any relational database are not allowed to be NULL - it's one of the main, fundamental characteristics of a primary key.. See: SQL by Design: how to Choose the primary key Never Null No primary key value can be null, nor can you do anything to render the primary key null. This is an inviolate rule of the relational model as supported by ANSI, of relational database management ...

If I have a document with a table in it, how do I add a new paragraph directly after the table? For example: Note the cross reference (which is a hyperlink) back to Heading 1b.. The only way I've found to add a new paragraph after the table (but before Heading 1b) is to put the cursor at the start of Heading 1b, and press Enter. This adds a new paragraph with style Heading 1, which I can fix by ...

In a recent review published in Nature Reviews Chemistry, Cronin group researchers describe how machine learning, coupled with real-time chemistry, is set to change the way chemists discover molecules, reactions and reactivity, as well as removing researcher bias. The systems discussed would remove the need to have an biased human chemist making judgements, in favour of searching chemical space ...
