This established the first strong link between early cognitive development and the functions of a specific brain region. That gave encouragement to others that rigorous experimental work addressing brain-behavior relations was possible in infants. It also fundamentally altered the scientific understanding of PFC early in development; clearly it was not silent as accepted wisdom had held.

Ben Wilson, you are 100% correct. What choice do we have anymore? All the damage has been done and it wasn't Trump who changed rules in regard to marriage, making abortion OK, letting people have gender problems due to a little four year old wanting to change, a real bad example for the whole country.
