For a solution, Raoult's law relates the relative concentrations of the components in solution with their relative vapor pressures above the solution.

Definition of Raoult's Law | Chegg.com

The use of metric prefixes dates back to the inception of the French metric system, in 1793. It was originally decided that the submultiples of all basic units would be prefixed with a Latin root, corresponding to the decimal divisor (deci for 10, centi for 100, milli for 1000), whereas the decimal multiples would be prefixed with a Greek root, corresponding to the decimal multiplier (deca for ...
