The lac operon of the model bacterium *Escherichia coli* was the first operon to be discovered and provides a typical example of operon function. It consists of three adjacent structural genes, a promoter, a terminator, and an operator. The lac operon is regulated by several factors including the availability of glucose and lactose. It can be activated by allolactose.

Life is a characteristic that distinguishes physical entities that have biological processes, such as signaling and self-sustaining processes, from those that do not, either because such functions have ceased (they have died), or because they never had such functions and are classified as inanimate. Various forms of life exist, such as plants, animals, fungi, protists, archaea, and bacteria.

Life - Wikipedia

It was first reported among neuropsychiatric disorders that de novo CNV is strongly associated with ASD [1]. ASD is a childhood psychiatric disorder and a neurodevelopmental disorder. The major symptoms are impaired social interaction and communication, and restricted and repetitive behavior, interests and activity.
