The kernel is a computer program that is the core of a computer's operating system, with complete control over everything in the system. On most systems, it is one of the first programs loaded on start-up (after the bootloader). It handles the rest of start-up as well as input/output requests from software, translating them into data-processing instructions for the central processing unit.

Kernel (operating system) - Wikipedia

"I have tried and tested at least 5 different CMMS systems before trying Limble, and I must say I haven't come across something as intuitive yet powerful as Limble CMMS. There are [3] features that will make me recommend this to anyone: the robustness of the system, and ease of use, and the customer service."
