The field of economics known as macroeconomics focuses on the behaviors of a national economy, or a regional economy, as a whole. Macroeconomics is a very general field that concerns itself primarily with large scale indicators, such as unemployment rates, and with the creation of models meant to explain relationships between those indicators. It is also considered the complement to ...

The correct answer is: "the amount consumed slightly changes with the price". The graph depicts a demand function. A demand function represents the quantity of a certain good or service that consumers are willing to purchase at different price levels. The law of demand states that there is an inverse relationship between price and quantity demanded (ceteris paribus, hence, given that the rest ...
