Biology is the natural science that studies life and living organisms, including their physical structure, chemical processes, molecular interactions, physiological mechanisms, development and evolution. Despite the complexity of the science, there are certain unifying concepts that consolidate it into a single, coherent field. Biology recognizes the cell as the basic unit of life, genes as ...

Modern history, the modern period or the modern era, is the linear, global, historiographical approach to the time frame after post-classical history. Modern history can be further broken down into periods: The early modern period began approximately in the early 16th century; notable historical milestones included the European Renaissance, the Age of Discovery, and the Protestant Reformation.

Credits: 1. Prerequisite: Middle school biology and chemistry. Recommended: 9th or 10th Test Prep: CLEP Biology This course covers the basic material for this exam, but this is considered a very hard test, and I would suspect more will need to be studied to learn everything required for this huge exam. It's worth the same as two college courses which is why it covers so much.
