Explain your answer. (E-80) Newton's first law states: An object at rest will stay at rest unless acted on by an unbalanced force. An object in motion will stay in motion at the same speed and in the same direction unless acted n by an unbalanced force. A bowling ball has more inertia because it would take more force to change its motion than it

is no motion or change. As soon as one person exerts more force, the forces become unbalanced. Unbalanced forces always result in motion. In the case of the arm wrestling, the stronger arm will overtake the weaker arm and push it down. Once an object is set into motion, we can measure how fast it travels and calculate its
