Things are a bit different when you need to find the volume, pressure, or temperature of a gas not at STP. You will need to solve  $PV = nRT$  for the dimension you need to find and attach it to the end of the sequence using the roadmap to find 'n' for the gas. Let's take another problem based on the same chemical equation to explore how to set up finding a gas not at STP.

Hydraulic fracturing in the United States began in 1949. According to the Department of Energy (DOE), by 2013 at least two million oil and gas wells in the US had been hydraulically fractured, and that of new wells being drilled, up to 95% are hydraulically fractured. The output from these wells makes up 43% of the oil production and 67% of the natural gas production in the United States.

Gas lighting is production of artificial light from combustion of a gaseous fuel, such as hydrogen, methane, carbon monoxide, propane, butane, acetylene, ethylene, or natural gas.. The light is produced either directly by the flame, generally by using special mixes of illuminating gas to increase brightness, or indirectly with other components such as the gas mantle or the limelight, with the ...

Creationists often argue that evolutionary processes cannot create new information, or that evolution has no practical benefits. This article disproves those claims by describing the explosive growth and widespread applications of genetic algorithms, a computing technique based on principles of biological evolution.

In 1954, however, this all changed with the Supreme Court's decision in *Phillips Petroleum Co. v. Wisconsin* (347 U.S. 672 (1954)). In this decision, the Supreme Court ruled that natural gas producers that sold natural gas into interstate pipelines fell under the classification of 'natural gas companies' in the NGA, and were subject to regulatory oversight by the FPC.
