Key Concepts. A submerged object displaces a volume of liquid equal to the volume of the object. One milliliter (1 mL) of water has a volume of 1 cubic centimeter (1cm³).; Different atoms have different sizes and masses.

Finding Volume—The Water Displacement Method | Chapter 3 ...

The measurement problem in quantum mechanics is the problem of how (or whether) wave function collapse occurs. The inability to observe such a collapse directly has given rise to different interpretations of quantum mechanics and poses a key set of questions that each interpretation must answer.. The wave function in quantum mechanics evolves deterministically according to the Schrödinger ...
