Horner syndrome (Horner's syndrome) results from an interruption of the sympathetic nerve supply to the eye and is characterized by the classic triad of miosis (ie, constricted pupil), partial ptosis, and loss of hemifacial sweating (ie, anhidrosis). The term Horner syndrome is commonly used in English-speaking countries, whereas the term Ber...

Horner Syndrome: Overview, Anatomy, Pathophysiology

Thanks to recent advances in technology, we have a clearer understanding of how these effects are related to early brain development. Neuroscientists can now identify patterns in brain activity that appear to be associated with some types of negative early experiences. 1 But the long-term effects of early stress, poverty, neglect and maltreatment were well documented and virtually uncontested ...
