Heredity - Chromosomal aberrations: The chromosome set of a species remains relatively stable over long periods of time. However, within populations there can be found abnormalities involving the structure or number of chromosomes. These alterations arise spontaneously from errors in the normal processes of the cell. Their consequences are usually deleterious, giving rise to individuals who ...

BIOLOGY - cisce.org

Credits: 1. Prerequisite: Middle school biology and chemistry. Recommended: 9th or 10th Test Prep: CLEP Biology This course covers the basic material for this exam, but this is considered a very hard test, and I would suspect more will need to be studied to learn everything required for this huge exam. It's worth the same as two college courses which is why it covers so much.

Biology with Lab - Easy Peasy All-in-One High School

Biology. Explore the science of life by learning about the systems and structures that make up the organisms of our world.

Biology - ThoughtCo

True/False Section – designed to give those with double recessive hair colour a chance 😊! Note: only one of those two options is allowable /! 1. Chromosomal inversions do not affect the phenotypes of organisms because all of same genes are still present on the same chromosome.
