I intend to to work through Visual complex analysis this summer, and your solutions are a great resource. Keep up the good work! If you don't mind I'd be able to contribute some solutions as well. Let me know if you are interested. P.S. Any reason that you skipped chapter 6-7? Reply Delete

Visual Complex Analysis: Visual Complex Analysis

"Sweet Feynman has it been a fun last couple days! I picked up Tristan Needham's Visual Complex Analysis from the University of Waterloo library and this book has reminded me why I fell in love with math as a wee lad. The book's pedagogical approach is to teach math the way mathematicians actually think about it - visually.

Complex Analysis in my opinion is very visual and they did not in my opinion capture this visual component of the subject well at all. Sorry I can't give examples, I looked on my bookshelf and

seem not to have it anymore.

Purely as a matter of personal preference, I would liked to have seen more exercises relating complex numbers to the geometry of the plane (Needham's Visual Complex Analysis has lots of them, without solutions) but of course not everybody shares my personal predilections.

Needham wrote the book Visual Complex Analysis, which has received positive reviews. Though it is described as a "radical first course in complex analysis aimed at undergraduates", writing in Mathematical Reviews D.H. Armitage opined that "the book will be appreciated most by those who already know some complex analysis."

Tristan Needham - Wikipedia

This radical first course on complex analysis brings a beautiful and powerful subject to life by consistently using geometry (not calculation) as the means of explanation. Aimed at undergraduate students in mathematics, physics, and engineering, the book's intuitive explanations, lack of advanced prerequisites, and consciously user-friendly prose style will help students to master the subject ...
