A QA implementation, usually a computer program,...

Question answering - Wikipedia

for answering questions (as contrasted with the direct lookup operations of the formal language systems). The first of these is a merger of Raphael's earlier line of thought, first with formal theorem-proving techniques (Green and Raphael 1968), then with a natural language semantic system developed by Coles (1968).

Natural language question-answering systems: 1969

Create a Natural Language Question Answering system with IBM Watson Thu, Apr 14, 2016.
Recently I started a new project to build QA system for Mindvalley. After a short discussion with my colleagues we decided to use the 2011 jeopardy winner (Watson).

Create a Natural Language Question Answering system with ...

We need systems that allow a user to ask a question in everyday language and receive an answer quickly and succinctly, with sufficient context to validate the answer. Current search engines can return ranked lists of documents, but they do not deliver answers to the user. Question answering systems address this problem.

Natural language question answering: the view from here ...

Question Answering (QA) is the task of automatically generating answers to natural language questions from humans, serving as one of the primary research areas in natural language human-computer interaction. The key challenge in QA is the generation and recognition of indicative signals for answer patterns.

Feature-driven Question Answering with Natural Language ...

The patent filing mentions multiple times how information might be found to help answer questions from such sources, but it also describes how natural language processing plays a large role in answering questions as well. In short, the process described in the patent application has a number of parts:

Microsoft Disses Watson, Describes a Natural Language ...

A question answering (QA) system aims at automatically finding concise answers to arbitrary questions phrased in natural language. It delivers only the requested information, unlike search engines which refer to full documents.
