I recently showed several ways to display Multiple Series in One Excel Chart. The current article describes a special case of this, in which the X values are dates. Displaying multiple time series in an Excel chart is not difficult if all the series use the same dates, but it becomes a problem if the dates are different, for example, if the series show monthly and weekly values over the same ...

Hi, Thank you ever so much for the above - very helpful! I was just wondering if you might be able to help me expand the formula somewhat? I am interested in combining this with another IF and checking against an additional column e.g. if column A = M AND column B = Y then use INDEX to find the different values e.g. the first instance of Y=Z, the second instance of Y=Z, the first instance of Y ...
