A column or pillar in architecture and structural engineering is a structural element that transmits, through compression, the weight of the structure above to other structural elements below. In other words, a column is a compression member. The term column applies especially to a large round support (the shaft of the column) with a capital and a base or pedestal which is made of stone, or ...

Column - Wikipedia

A sword is a bladed weapon intended for slashing or thrusting that is longer than a knife or dagger, consisting of a long blade attached to a hilt. The precise definition of the term varies with the historical epoch or the geographic region under consideration. The blade can be straight or curved.

Emperors of the Sangoku,, the "Three Kingdoms," of India, China, & Japan. India and China are the sources of the greatest civilizations in Eastern and Southern Asia. Their rulers saw themselves as universal monarchs, thereby matching the pretensions of the Roman Emperors in the West. The only drawbacks to their historical priority were that India suffered a setback, when the Indus Valley ...
