Hemophilia B is classically transmitted as an X-linked recessive disorder. Cutler et al. (2004) described a family in which the usual pattern of X-linked inheritance of hemophilia B was complicated by mosaicism in the proband's maternal grandfather. The proband was a male infant with severe factor IX deficiency who was initially thought to be a sporadic case.

OMIM Entry - # 306900 - HEMOPHILIA B; HEMB

Theodosius Grygorovych Dobzhansky (Ukrainian: Теодосій Григорович Добжанський; Russian: Феодосий Григорьевич Добржанский; January 25, 1900 – December 18, 1975) was a prominent Ukrainian-American geneticist and evolutionary biologist, and a central figure in the field of evolutionary biology for his work in shaping the ...

Theodosius Dobzhansky - Wikipedia

Evolutionary biology is the subfield of biology that studies the evolutionary processes that produced the diversity of life on Earth, starting from a single common ancestor. These processes include natural selection, common descent, and speciation.. The discipline emerged through what Julian Huxley called the modern synthesis (of the 1930s) of understanding from several previously unrelated ...

Evolutionary biology - Wikipedia

Because each person has two copies of the MTHFR gene, people can inherit one copy of a MTHFR gene variant or two copies of it (one from each parent). People who inherit two copies of C677T have a higher risk for having a child with a neural tube defect. Having two C677T variants and elevated homocysteine levels may cause a slightly higher risk for blood clots.
