A circular sector is a wedge obtained by taking a portion of a disk with central angle  $\theta < \pi$  radians (180 degrees), illustrated above as the shaded region. A sector with central angle of  $\pi$  radians would correspond to a filled semicircle. Let  $R$  be the radius of the circle,  $a$  the chord length,  $s$  the arc length,  $h$  the sagitta (height of the arced portion), and  $r$  the apothem (height of the ...

United States customary units are a system of measurements commonly used in the United States. The United States customary system (USCS or USC) developed from English units which were in use in the British Empire before the U.S. became an independent country. However, the United Kingdom's system of measures was overhauled in 1824 to create the imperial system, changing the definitions of some ...
