In atomic physics, the spin quantum number is a quantum number that parameterizes the intrinsic angular momentum (or spin angular momentum, or simply spin) of a given particle. The spin quantum number is the fourth of a set of quantum numbers (the principal quantum number, the azimuthal quantum number, the magnetic quantum number, and the spin quantum number), which completely describe the ...

Newton's method, also called the Newton-Raphson method, is a root-finding algorithm that uses the first few terms of the Taylor series of a function  $f(x)$  in the vicinity of a suspected root. Newton's method is sometimes also known as Newton's iteration, although in this work the latter term is reserved to the application of Newton's method for computing square roots.

Test description. The Invitae Hereditary Spastic Paraplegia Comprehensive Panel analyzes up to 65 genes associated with hereditary spastic paraplegia (HSP). These genes include the most common causes of autosomal dominant, autosomal recessive, and X-linked HSP. The clinical presentation of HSP is variable, and the Invitae Hereditary Spastic Paraplegia Comprehensive Panel may confirm a clinical ...

The electrochemical withdrawing of energy from these two types of power sources differs significantly. It is clear that in a typical accumulator a charge/discharge plateau is observed for the dependence  $U=f(t)$ , and for an electrochemical capacitor we have almost a linear decay of voltage with time. As a consequence, the energy stored in the capacitor ( $1/2 qU$ ) is half that for the equivalent ...

History. The S-matrix was first introduced by John Archibald Wheeler in the 1937 paper "On the Mathematical Description of Light Nuclei by the Method of Resonating Group Structure". In this paper Wheeler introduced a scattering matrix – a unitary matrix of coefficients connecting "the asymptotic behaviour of an arbitrary particular solution [of the integral equations] with that of solutions ...
