A perceptual set refers to a predisposition to perceive things in a certain way. In other words, we often tend to notice only certain aspects of an object or situation while ignoring other details.

Perceptual Sets in Psychology - Verywell Mind

In Freud's theory of psychosexual development, the superego is the last component of personality to develop. The id is the basic, primal part of personality, that is present from birth. Next, the ego begins to develop during the first three years of a child's life.

The Importance of the Superego in Psychology - Verywell Mind

In primates (including humans), one convenient way to study information-seeking is the k-arm bandit task (Gittins and Jones, 1974; Figure 2). In this task, decision-makers are faced with a series of choices between stochastic reward (Whittle, 1988). The optimal strategy requires adjudication between exploration (sampling to improve knowledge and, therefore, future choices) and exploitation ...
