In biology, an organism (from Greek: ὁργανισμός, organismos) is any individual entity that exhibits the properties of life. It is a synonym for "life form". Organisms are classified by taxonomy into specified groups such as the multicellular animals, plants, and fungi; or unicellular microorganisms such as a protists, bacteria, and archaea. All types of organisms are capable of ...

Evolution is change in the heritable characteristics of biological populations over successive generations. These characteristics are the expressions of genes that are passed on from parent to offspring during reproduction. Different characteristics tend to exist within any given population as a result of mutation, genetic recombination and other sources of genetic variation.

From a value point of view, one can often get better real world performance out of more SATA 7.2k drives than fewer SAS 15k drives with the price being similar.

HDD: performance differences between 7.2k SATA and 15k SAS ...

The most practical options are likely to be them having ADSL broadband installed or using mobile broadband as mentioned by alpha1. Anything else is getting into real try-it-and-see territory or expensive options - for example, a 5GHz link will run up to 21Km if you have near line of sight, but will set you back around £1700 + installation costs.

None of these answers is complete. You can see this just by browsing a Maven repository. An artifact is apparently a directory satisfying some constraints, e.g. it must contain a file called maven-metadata.xml and a file called <artifactId>-<version>.pom. Both of those files have some undocumented schema and semantics. - jamesfisher Oct 29 '14 at 11:16
