Force is usually measured in the Unit of Newtons, an important measurement in Physics and Engineering. A Newton is how much force it takes to make 1 kg accelerate at 1 m/s<sup>2</sup>. 1 Newton = 1 kg m/s<sup>2</sup> (one kilogram meter per second squared). So force is actually based on the meter, kilogram and second.

### **Metric System of Measurement - Math is Fun**

Measurement is the process of determining how large or small a physical quantity is as compared to a basic reference quantity of the same kind. Different systems of units are based on different choices of a set of base units. The most widely used system of units is the International System of Units,...
