In chemistry, resonance is a way of describing bonding in certain molecules or ions by the combination of several contributing structures (or forms, also variously known as resonance structures or canonical structures) into a resonance hybrid (or hybrid structure) in valence bond theory. It has particular value for describing delocalized electrons within certain molecules or polyatomic ions ...

Resonance (chemistry) - Wikipedia

The repetitive fractal pattern is evident in this cross-section diagram of the parts of a steel cable, but one thing that's not visible above is that the various 'strands,' 'ropes' and 'cables' are all wrapped to spiral around each other, which greatly increases the total strength of the cable. The image below shows a piece of steel cable from the side, allowing you to see two levels of ...

During the seventeenth and especially eighteenth centuries, driven both by a desire to understand nature and a quest to make balloons in which they could fly (), a number of scientists established the relationships between the macroscopic physical properties of gases, that is, pressure, volume, temperature, and amount of gas. Although their measurements were not precise by today's standards ...

9.2 Relating Pressure, Volume, Amount, and Temperature ...

Modern history, the modern period or the modern era, is the linear, global, historiographical approach to the time frame after post-classical history. Modern history can be further broken down

into periods: The early modern period began approximately in the early 16th century; notable historical milestones included the European Renaissance, the Age of Discovery, and the Protestant Reformation.
