A microwave cavity or radio frequency (RF) cavity is a special type of resonator, consisting of a closed (or largely closed) metal structure that confines electromagnetic fields in the microwave region of the spectrum. The structure is either hollow or filled with dielectric material. The microwaves bounce back and forth between the walls of the cavity. At the cavity's resonant frequencies ...

Yole Développement (Yole) has just released a report showing an industry shift in packaging technology as 5G is implemented. They state that 5G will totally redefine how the RF front-end interacts in-between the network and the modem. The new RF bands for sub 6 GHz pose big challenges for the industry. Yole Développement (Yole) and System Plus Consulting have investigated this trend toward ...
