Chamberlain line is a line joining the back of hard palate with the opisthion on a lateral view of the craniocervical junction.. Significance. It helps to recognize basilar invagination which is said to be present if the tip of the dens is  $>3$  mm above this line.. McGregor developed a modification of the Chamberlain line for when the opisthion could not be identified on plain radiographs.

### **Chamberlain line | Radiology Reference Article ...**

The immune system is a host defense system comprising many biological structures and processes within an organism that protects against disease. To function properly, an immune system must detect a wide variety of agents, known as pathogens, from viruses to parasitic worms, and distinguish them from the organism's own healthy tissue. In many species, the immune system can be classified into ...
