Microeconomics Behavior Institutions And Evolution

Microeconomics (from Greek prefix mikro-meaning "small" + economics) is a branch of economics that studies the behaviour of individuals and firms in making decisions regarding the allocation of scarce resources and the interactions among these individuals and firms.. One goal of microeconomics is to analyze the market mechanisms that establish relative prices among goods and services and ...

Microeconomics - Wikipedia

Economics is much broader than the study of recessions and inflation or stocks and bonds. Economists study decision making and incentives, such as the incentives for a firm to stop polluting and how taxes create incentives for labor market and savings behavior.
