The Student's t-test is a statistical test that compares the mean and standard deviation of two samples to see if there is a significant difference between them. In an experiment, a t-test might be used to calculate whether or not differences seen between the control and each experimental group are a factor of the manipulated variable or simply the result of chance.

Even with an increasing number of high-tech tools available to hospitals, labs often struggle to optimize critical value reporting. One of the most challenging aspects of this issue is the volume of unanswered pages and forgotten callbacks from physicians, despite the fact that nearly 90% of physicians walk around with smartphones in their pockets.
