Start studying ch 12 nervous system. Learn vocabulary, terms, and more with flashcards, games, and other study tools.

ch 12 nervous system Questions and Study Guide | Quizlet ...

Normally after a nerve cell fires, inhibitory influences prevent a second firing of the neuron until the internal charge of the neuron returns to its resting state. Gamma-amino-butyric acid is the principal inhibiting chemical in the brain. GABA opens channels for negatively charged chloride ions to flood into the excited neuron, which decreases the internal charge and prevents a second firing ...

What is the Pathophysiology of Seizures? (with pictures)

Leighton, If it is known that a neurologic condition or disease is present, then it is probably best not to use Botox Cosmetic. What may occur more commonly is that a patient that has a previously undiagnosed or subclinical neurologic condition becomes unmasked when Botox is used for cosmetic reasons.
