Welcome to the Dragonfly Book. We established this web site to support our "Dragonfly" book, first published in 2002. When the book was current, we established web pages to support each of the book's chapters, and included a host of links and other web resources for teachers and students.

### **Miller & Levine: The Dragonfly Book - BIOLOGY by Miller ...**

This is our personal web site, dedicated to students and teachers using our new Macaw textbook for High School Biology. We've given each chapter its own web page, with links to outside resources to help you explore the incredible world of Biology today.

### **Biology by Miller & Levine**

This site serves as a resource site for students in Biology 2 & 2A. The goal of this course is to provide a general overview of major biological topics, provide opportunities for laboratory investigations, and expose students to current advances in biology and medicine.

### **Biology 2 & 2A**

Developmental biology is the study of the process by which animals and plants grow and develop. Developmental biology also encompasses the biology of regeneration, asexual reproduction, metamorphosis, and the growth and differentiation of stem cells in the adult organism.. In the late 20th century, the discipline largely transformed into evolutionary developmental biology

The lac operon of the model bacterium *Escherichia coli* was the first operon to be discovered and provides a typical example of operon function. It consists of three adjacent structural genes, a promoter, a terminator, and an operator. The lac operon is regulated by several factors including the availability of glucose and lactose. It can be activated by allolactose.
