This course is great tbh, Hussam knows what he is doing and he updated the content to python 3 so it is up to date. The real world examples are really cool and good explained.

Python 3 For Offensive PenTest: A Complete Practical Course

The Visual Designer for Arduino AVR product uses an integrated flowchart editor for software design and an extensive range of pre-designed shields and sensors for hardware design. These virtual hardware blocks contribute high level methods (e.g. drawBitmap(), spinMotor()) to the programming environment so that complex hardware can be controlled with a relatively simple flowchart.

A Global Standard in Education - Proteus Design Suite
