Game theory is the study of mathematical models of strategic interaction between rational decision-makers. It has applications in all fields of social science, as well as in logic and computer science. Originally, it addressed zero-sum games, in which one person's gains result in losses for the other participants. Today, game theory applies to a wide range of behavioral relations, and is now an ...

Trade generates efficiency gains. If we look at country-level data from the last half century we find that there is a correlation between economic growth and trade: countries with higher rates of GDP growth also tend to have higher rates of growth in trade as a share of output.. This basic correlation is shown in the chart below, where we plot average annual change in real GDP per capita ...
