Immanuel Kant (1724–1804) is the central figure in modern philosophy. He synthesized early modern rationalism and empiricism, set the terms for much of nineteenth and twentieth century philosophy, and continues to exercise a significant influence today in metaphysics, epistemology, ethics, political philosophy, aesthetics, and other fields.

David Ray Griffin, PhD – Professor Emeritus, Philosophy of Religion and Theology, Claremont School of Theology. Author/editor of over two dozen books, Prof. Griffin first questioned the 9/11 official story in 2003 while exploring a 9/11 timeline filled with reliable, verifiable facts suggesting a major cover-up. He then switched his focus from theology to 9/11 research.

An important use of technology is its capacity to create new opportunities for curriculum and instruction by bringing real-world problems into the classroom for students to explore and solve; see Box 9.1. Technology can help to create an active environment in which students not only solve problems, but also find their own problems.

Self-organization, also called (in the social sciences) spontaneous order, is a process where some form of overall order arises from local interactions between parts of an initially disordered system. The process can be spontaneous when sufficient energy is available, not needing control by any external agent. It is often triggered by random fluctuations, amplified by positive feedback.

### **Self-organization - Wikipedia**

Positivism is a philosophical theory stating that certain ("positive") knowledge is based on natural phenomena and their properties and relations. Thus, information derived from sensory experience, interpreted through reason and logic, forms the exclusive source of all certain knowledge.

Positivism holds that valid knowledge (certitude or truth) is found only in this a posteriori knowledge.
