KEVIfW exercise 13 - Morgan Park High School

The anatomy of nerves. The nervous system is one of two key control systems of the body that sends and receives messages, enabling us to function properly. It is able to do this because of the nerves that connect the brain and spinal cord with our peripheral regions (legs and arms) and viscera (organs).

Essentials of Human Anatomy & Physiology Laboratory Manual

Neurons and Nerves Neurons are unique for many reasons. For one, they have a shape that is not like any other cells. Nerve cells are also some of the longest cells in your body. There are nerve cells as long as a meter. They stretch from your hips all the way down to your toes! This is very uncommon for cells, which are usually very short. Most cells are 20 micrometers in
