LabBench Activity Chi-Square Analysis of Data. Look at the tables you printed from Case 1.From the data presented, you can deduce that the F 1 cross was between individuals heterozygous for eye color: +se  $\times$  +se (+ = red; se = sepia ). From this conclusion, you could write the following hypothesis: "If the parents are heterozygous for eye color, there will be a 3:1 ratio of red eyes to sepia ...

PRESENTATION. Some readers wrote to us asking for more experiments and toys to build. As we need of some months to complete an article, we thought of collecting interesting topics, equip them with a short description and links to already existing sites.

# Science Experiments on Environmental Education and Biology

Credits: 1. Prerequisite: Middle school biology and chemistry. Recommended: 9th or 10th Test Prep: CLEP Biology This course covers the basic material for this exam, but this is considered a very hard test, and I would suspect more will need to be studied to learn everything required for this huge exam. It's worth the same as two college courses which is why it covers so much.
