Integrated Control Systems (ICS) | INTECH Process Automation

A fire-control system is a number of components working together, usually a gun data computer, a director, and radar, which is designed to assist a weapon system in targetting, tracking and hitting its target. It performs the same task as a human gunner firing a weapon, but attempts to do so faster and more accurately.

Fire-control system - Wikipedia

Radar is a detection system that uses radio waves to determine the range, angle, or velocity of objects. It can be used to detect aircraft, ships, spacecraft, guided missiles, motor vehicles, weather formations, and terrain.A radar system consists of a transmitter producing electromagnetic waves in the radio or microwaves domain, a transmitting antenna, a receiving antenna (often the same ...
