Part I: 22 Multiple choice questions (2 points each)
Multiple choice questions on Data Structures and Algorithms topic Linked Lists. Practice these MCQ questions and answers for preparation of various competitive and entrance exams.

Data Structures and Algorithms Multiple choice Questions ...
The slow random-access performance of a linked list makes other algorithms (such as quicksort) perform poorly, and others (such as heapsort) completely impossible. Since worst case time complexity of Merge Sort is O(nLogn) and Insertion sort is O(n^2), merge sort is preferred. See following for implementation of merge sort using Linked List.
