There's been much justifiable excitement about social media recently; are you on top of it? The recognition that learning is 80% informal suggests that we need to support natural connections between people who can help one another. And we can distribute that support between employees, partners, or customers. You can see real benefits, but you've got to have a way to think about them!

Social Networking: Bridging Formal and Informal Learning ...

Network virtualization technology takes software-defined networking (SDN) to the next level by truly decoupling network resources from underlying hardware. In much the same way that server virtualization emulates a physical server within software, network virtualization emulates the components of network and security services in software.
